

There is a new sector established during 2007 on the three caves above the village of Telendos. If you visit the island for climbing you will find it provides excellent routes of all levels.

There are some very steep routes on holes and small tufas inside the caves of Telendos, with vertical routes on the outside walls on a good sprinkling of holes. Ideal for climbing in the afternoon in summer.

Access to the caves: From the harbor, follow the well-marked footpath to the northern beaches. 100 meters after the last building (hotel), turn left and follow the blue signs for a further 20 minutes. The total time from the harbor should be around 25 minutes.
